Animal Movement Requirements

Learn the requirements for [moving animals into and within Florida](#).

African Swine Fever Update

The U.S. Department of Agriculture recently announced the detection of African Swine Fever (ASF) in the Dominican Republic. View [the announcement and other ASF resources](#).

The Division of Animal Industry is responsible for enforcing animal health regulations in Florida and protecting the state from animal pests and diseases.

District veterinarians and animal health inspectors throughout the state work with producers, animal owners and private veterinarians to monitor and enhance the health and welfare of Florida's animals.

Under Florida's Comprehensive Emergency Management Plan, we serve as the lead agency for animal and agricultural issues, planning and coordinating the state's response to emergencies ranging from hurricanes to animal disease outbreaks.
